The LearnKey Experience

When a student is referred to LearnKey, they experience much more than just our online courseware. They get a full support system to help them succeed. At LearnKey, we understand students need interaction to stay motivated and to complete any type of career training program. We cannot simply hand someone a book (or online solution) and expect them to complete their studies and become proficient at the professional level all on their own. With every student, we strive to provide the support and encouragement they need to be successful in their chosen career.

The full support system includes:

- Education coaching
- Student services representatives
- Monthly student progress reports to counselors
- Group study sessions
- Personal tutoring
- Employment coaching and placement assistance
- Certify for Life program - access to free course updates for certain programs

This is what counselors are saying about us:

I believe that your program is an excellent option to help our participants gain the skills that they need to become employable.

Florida DVR

Thanks for the information. All looks well. I will visit with -----, It will more than likely be the first of next week. I appreciate all of the assistance.

VRC Oklahoma

I'm also glad to be working with you and your team to support such deserving veterans. Really appreciate you and the services LearnKey provides.

VRC Hawaii

You are so appreciated! Thank you for your assistance. I will be sending more Veterans your way. Thank you.

VRC West Virginia

I really appreciate the reports. And your finance guy included my authorizations! You two sure do make my life easier. :) I've attached two more referrals for you.

VRC Michigan

I just wanted to say THANK YOU for all that you do for our student Veterans, especially now during this pandemic.

VRC North Dakota

I appreciate all of your time and effort in providing quality services and education to our Veterans who have, or are now attending your programs at LearnKey.

VRC Nevada

You KNOW that LearnKey is one of the top computer training programs I discuss with veterans, precisely for these reasons! The proof is in the pudding!

VRC Hawaii

You guys have a good track record with the veterans that I've personally put into your program. Thanks.

VRC Washington

LearnKey Certify for Life Program

Finishing a vocational training program and getting a career is an amazing accomplishment. Upon receiving your certifications, how are you going to keep on top of all the changes in software and technology? Most nationally recognized certifications go through some sort of update every 2-3 years. If you are like most people, you would ignore these updates and allow your certifications and skill set to slowly become outdated. Why do people allow that to happen? The answer is time and cost.

The LearnKey Certify for Life program covers unlimited courseware updates for life for those students who complete their certification programs through LearnKey. Most nationally recognized certifications go through an update every 2-3 years. Students will have access to the updated LearnKey signature courseware to prepare for the new exams.

As an example; our CompTIA A+ 1000 Series courseware would cost \$700, LearnKey graduates can get the updated courseware free of charge. To complete the updated certification, the student would need to purchase the test prep and exam vouchers.

** Live courses may not be available for unlimited updates under this program. Not all courses at LearnKey are covered under the Certify for Life program; see these and other details / restrictions in the back section of this catalog.*

Here is a typical example of a person's continuing education needs: say you are in an IT career path and you have earned the CompTIA A+, Network+, Security+, Microsoft Word, Microsoft Excel, and Cisco CCNA certifications. Purchasing updated courseware for these areas of study typically costs around \$3,200 for each update (collectively). This is what it will look like over a career:

Year 3	\$3,200
Year 6	\$3,200
Year 9	\$3,200
Year 12	\$3,200
Year 15	\$3,200
Year 18	\$3,200
Year 21	\$3,200
Total Savings	\$22,400

Signature Certification Program

Highly specialized job readiness program

Our Signature Certification program is all about improving your employability skills through a highly specialized job readiness and employment assistance program where we provide each student with the tools and skills necessary to get them into an upward mobility career.

What sets the LearnKey Signature Program apart is our immediate focus on enhancing your employability right from the start of your program. You'll be introduced to and engaged in employability activities from day one, ensuring a proactive and comprehensive approach to your career development.

Who can participate?

LearnKey offers open enrollment, allowing any interested students to participate in our programs and courses. Students who wish to enroll are first pre-screened to determine their suitability for the program of their choice. An assessment is required for admission. LearnKey holds the belief that, as a student, possessing the desire and self-motivation to step up and demonstrate your abilities is essential, regardless of past experiences.

How does it work?

Our Signature Certification and Employability program enables students to engage with our Employability Team throughout their time with LearnKey with an emphasis placed on:

- Employability Team for coaching and placement assistance
- Creating a professional online presence (LinkedIn, etc.)
- Preparing a professional resume
- Addressing behaviors which may be roadblocks to employment
- Reaching milestones through employment goal setting
- How to utilize natural talents and behaviors in the workplace

Once students complete about 75% of their program, the Employability Team will begin to assist students in preparing for job interviews with hiring companies in our employer network. The student must be willing to travel up to one hour (each way) for the interview.

ProScan® is a reliable advanced survey tool that accurately assesses a person's basic and preferred work styles. Understanding the ProScan® results, including the information about behavior, gives us information about our strengths and potential blind spots. A ProScan® assessment is included in all LearnKey Signature Certification Programs to assist our students in job placement. ProScan® assessments can also be purchased separately on an individual basis.

What's Included?

Resources & Support

Each program includes instructive video, interactive labs, pretests and post-tests, test prep program, online student workbook, and exam vouchers. We will also include our LearnKey education coaching with weekly live group study sessions.

Employability Team

LearnKey's Employability Team's goal is to improve employability for students and graduates. Services start with self-discovery to learn about natural strengths. Next, the team will help students develop their resumes and prepare for finding the ideal job. We take a personal interest to help our alumni discover careers based on their natural strengths, experience, and preferences. The Employability Team provides a lifetime of guidance to all graduates of LearnKey.

Increased Skill Set and Employability

The technology industry has increasingly turned to nationally and globally recognized certifications to prove skill competency. Our programs increase students' potential to become strong candidates and appear more appealing to potential employers. Our team is committed to helping students gain certifications and better prepare them for the workforce.

Entry-Level Technical Support/Help Desk

Overview

This type of position is often the first stop on a career path for those wanting to begin a career in the Information Technology (IT) industry. People with this job must possess excellent customer service skills, troubleshooting skills, and, in some cases, the ability to make in-person or remote-based repairs to both hardware and software problems customers possess. Some of these positions are external-facing with customers while others are in-house, supporting fellow employees. Those who excel in this position often find paths for upward mobility for server, networking, or security positions.

Included

- Signature Certification program with intensive employment assistance
- Microsoft Word 365
- Microsoft Excel 365
- CompTIA IT Fundamentals
- CompTIA A+
- CompTIA Network+

Median Salary

\$32,000 - \$35,000

Entry-Level Cyber Security

Overview

This type of position is often referred to as a junior security administrator or similar title. This program will help those looking to eventually advance into a mid-to-upper level security administrator or security manager position. This position offers those with a fair amount of IT knowledge the chance to further develop one's cybersecurity skills while actively helping to ensure the overall security profile of a business and their customers. Upon completion of this program, many of these certifications apply as part of the requirements for CISSP certification.

Included

- Signature Certification program with intensive employment assistance
- Microsoft Word 365
- Microsoft Excel 365
- CompTIA IT Fundamentals
- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- EC-Council Ethical Hacking Essentials (EHE)
- EC-Council Certified Ethical Hacker (CEH)

Entry-Level Cyber Security Digital Forensics

Overview

This program is designed for IT professionals interested in information system security, computer forensics, and incident response. This program will build on knowledge in general computer knowledge, networking administration, security settings and applications, and will specialize in digital forensics. The program equips candidates with the necessary skills to proactively investigate complex security threats, allowing them to investigate, record, and report cybercrimes to prevent future attacks. The likely job titles would be forensic analyst, cybercrime investigator, cyber defense forensic analyst, incident responder, information technology auditor, malware analyst, security consultant, and chief security officer.

Included

- Signature Certification program with intensive employment assistance
- Microsoft Word 365
- Microsoft Excel 365
- CompTIA IT Fundamentals
- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- EC-Council Ethical Hacking Essentials (EHE)
- EC-Council Certified Ethical Hacker (CEH)
- EC-Council Digital Forensics Essentials (DFE)
- EC-Council Computer Hacking Forensic Investigator (CHFI)

Secure a Great Job

Advanced-Level Cyber Security

Overview

This career is for those who have experience in the cybersecurity field, and have come up through the ranks, often starting with a junior security administrator or similar position. Positions in this career include security administrator, chief security officer, and security manager. A person in this career path must stay on top of the latest security trends from a management standpoint and the latest security tools and vulnerabilities from a technical standpoint. Many who choose this career path also become security consultants. Anyone in this arena must fully understand both the measures of what attackers do and the countermeasures to stop the attackers.

Included

- Signature Certification program with intensive employment assistance
- Microsoft Word 365
- Microsoft Excel 365
- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- EC-Council Ethical Hacking Essentials (EHE)
- EC-Council Certified Ethical Hacker (CEH)

Advanced-Level Networking

Overview

This career path is for those who want to be a network administrator, that is, one in charge of designing, building, securing, overseeing, and maintaining networks. This can be done in a corporate environment or through businesses that manage customer networks. People in this career need to be well-versed in both hardware and software-defined networking and need to have a solid understanding of possible network attacks and how to thwart them. Some in this career pursue a general networking administration position while others become more specialized, an example being a Cisco administrator, which is a position in which one manages Cisco devices.

Included

- Signature Certification program with intensive employment assistance
- Microsoft Word 365
- Microsoft Excel 365
- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- EC-Council Network Defense Essentials (NDE)
- EC-Council Certified Network Defender (CND)
- Cisco Certified Network Associate (200-301)

Median Salary

\$64,000 - \$104,000

Cloud Administrator

Overview

This career path is for those who want to handle the cloud computing services for their company. Cloud Administrators manage the transition of data from a company's onsite location to the cloud. They also help maintain and improve the company's cloud platform. As more companies transition their data from onsite servers to cloud services, cloud administration will prove to be an in-demand career.

Included

Workforce Readiness Program

Overview

The LearnKey Workforce Readiness program is a short-term program designed to help job seekers develop job readiness skills, in addition to a better understanding of the behavior needed to present themselves professionally.

Program Benefits

- Online training software available 24/7
- Live tutoring sessions
- Reports on student progress

Program Details

Courses

- Effective Communication
- Communication Skills for Business
- Resilience
- Making a Good Impression
- Discovering Your Strengths

Employability Team

- Interview coaching and company research
- Optimize resumes for career pathways
- ProScan employability assessment and review
- Communication styles
- ProScan survey action items

Employability skills are general skills that are necessary for success in the labor market at all employment levels and in all sectors. These skills have several names—soft skills, workforce readiness skills, career readiness skills—but they all speak to the same set of core skills that employers want.

Time to Complete

- 2 Weeks

Students are assigned to work with a member of our student services team, who will help them progress through the training and answer questions and provide guidance when needed.

Office Management and Administration Training Program

Overview

The LearnKey Office Management and Administration Training program is designed to give the candidates the skills necessary to set them apart from other entry level office/administrative candidates.

Program Benefits

- Online training software available 24/7
- Live tutoring sessions
- Monthly reports on student progress
- Increased earning potential

Time to Complete

- 4.5 Months

- Full support system to help you succeed
- Provide understanding of programs
- Set training completion timeline
- Bi-weekly contact with a LearnKey team member to track progress
- LearnKey team member reports each client's progress to counselors bi-weekly
- Certify for Life program provides a "lifetime" of free signature LearnKey courseware updates for continuing education purposes (Exam Vouchers and Test Prep not included).

CompTIA

A+ / Network+ / Security+

Overview

CompTIA is the gold standard for entry-level IT training. There are currently over 260,000 people who are A+ certified alone, and this plus the Network+ and Security+, continue to be in demand with all types of employers. All three of these appear on the DoD directive 8570 list. This list is a list of required certifications for those who will work in government or government contractor related positions. These vendor-neutral certifications ensure one has an excellent base from which to launch their IT career. Topics cover computer hardware, troubleshooting, networking, and security at an entry, but professional level.

Included

- CompTIA A+, Network+, and Security+ courses
 - instructive video
 - interactive labs
 - pre-tests/post-tests
 - textbook(s)
- CompTIA CertMaster Labs
- CompTIA CertMaster Practice
- Certification Exam Voucher with Retake Option and Remote Proctoring Services

Cisco CCNA

Overview

The Cisco CCNA certification is considered the absolute best certification for those who manage and protect networks. Cisco is the biggest name in routing and switching and it not only influences but drives that sector. Cisco-certified technicians are in demand in the marketplace and the certification is also on the Department of Defense (DoD) 8140 (DoD 8570) Directive list. The DoD 8140/DoD 8570 Directive provides guidance and procedures for the training, certification, and management of all DoD employees, contractors, and others with privileged access to DoD Systems performing Information Assurance functions in their line of duty.

Included

- Cisco CCNA course
 - instructive video
 - network, router, and switch simulator labs
 - pre-tests/post-tests
 - textbook
- Weekly live group tutoring sessions
- Exam voucher
- Certify for Life program

Time to Complete

(ISC)² CISSP Certification Bundle

Overview

The (ISC)² Certified Information Systems Security Professional (CISSP) is the summit for which all cybersecurity techs aim. This certification covers a very broad sample of cybersecurity topics, including physical security, digital strategy, and policy creation. As a management-level certification, it sits at the top of the DoD directive 8140/8570 list of certifications and, because of that, it is constantly in demand and comes with an average salary of over \$100k per year.

NOTE: Candidates must have a **minimum of five years** cumulative paid work experience in **two or more of the eight domains** of the CISSP CBK. Earning a four-year college degree or regional equivalent or an additional credential from the (ISC)² approved list will satisfy one year of the required experience. Education credit will only satisfy one year of experience.

Included

- CISSP course
 - instructive video
 - interactive labs
 - pre-tests/post-tests
 - textbook
- Weekly live group tutoring sessions
- Exam voucher
- Certify for Life program

Time to Complete

3 Months

Azure Cloud Administrator

Overview

The Cloud Administrator career path is a three-course path consisting of Azure Fundamentals (AZ-900), Azure Administrator (AZ-104), and Azure Security Engineer (AZ-500). The Fundamentals course will give one a solid foundation of knowledge on cloud concepts and Azure and its role in building a cloud infrastructure. The Administrator course narrows the focus to setting up the network portion of an infrastructure. And the Security Engineer course focuses on securing an infrastructure. This career path and its three certifications will provide one with solid, employable skills for cloud administrator and related positions.

Included

- Azure Fundamentals, Azure Administrator, and Azure Security Engineer courses
 - Instructive video
 - Pre-tests/post-tests
 - Simulation labs
- Textbooks
- Weekly live group tutoring sessions
- Practice tests

EC-Council

Certified Ethical Hacker (CEH)

Overview

The Certified Ethical Hacker (CEH) is a core training program for an information security professional, also referred to as a white-hat hacker, who systematically attempts to inspect network infrastructure with the consent of its owner to find security vulnerabilities which a malicious hacker could potentially exploit. The course helps you assess the security posture of an organization by identifying vulnerabilities in the network and system infrastructure to determine if unauthorized access is possible. Student will begin their Certified Ethical Hacker in Ethical Hacking Essentials (EHE). This course is a segue into the EC-Council Certified Ethical Hacker (CEH) certification program. The Certified Ethical Hacker program is the most comprehensive Ethical Hacking program in the world.

Included

- EHE eCourseware
- CEHV12 eCourseware
- EHE & CEH labs subscription (6 months)
- EHE & CEH video add-on
- EHE & CEH textbook

EC-Council

Certified Incident Handler (ECIH)

Overview

The ECIH program offers professionals interested in pursuing incident handling and response as a career comprehensive training that not only imparts concepts but also allows them to experience real-life scenarios.

Organizations are under constant attacks and with the knowledge and skills found in the ECIH program, professionals can now not only detect incidents, but also quickly manage and respond holistically to these incidents.

An effective incident handling and response program ensures quick healing by reducing the time spent on containment and aims to reinstate business processes to the expected level of quality.

True employability after earning a certification can only be achieved when the core of the curricula maps to and is compliant with government and industry-published incident and response frameworks.

Included

Computer Hacking and Forensic Investigator (CHFI)

Overview

The Computer Hacking and Forensic Investigator (CHFI) program will prepare students to conduct computer investigations using ground-breaking digital forensics technologies. This program certifies individuals in the specific security discipline of computer forensics from a vendor-neutral perspective.

Computer forensics is simply the application of computer investigation and analysis techniques in the interests of determining potential legal evidence. Evidence might be sought in a wide range of computer crime or misuse, including but not limited to theft of trade secrets, theft of or destruction of intellectual property, and fraud. CHFI investigators can draw on an array of methods for discovering data that resides in a computer system, or recovering deleted, encrypted, or damaged file information known as computer data recovery. Students will start the Computer Hacking and Forensic Investigator bundle in the Digital Forensics Essentials (DFE) course. This program is a segue into the EC-Council Certified Computer Hacking and Forensic Investigator (CHFI) certification program.

Included

- DFE eCourseware
- CHFI eCourseware
- DFE & CHFI labs subscription (6 months)

Adobe Certified Professional in Visual Design

Overview

The Adobe Certified Professional in Visual Design validates the individual's expertise in creating and designing holistic digital aesthetics using Adobe Creative Cloud. This certification requires professional-level skills and knowledge to effectively create and develop digital creative assets.

Photoshop

LearnKey's Adobe Photoshop program is designed for both novice and advanced users when preparing for certification. Photoshop is the industry-standard image editing software, used worldwide by professional photographers, amateur photographers, and designers who want to perfect their digital images by going beyond what is captured by the camera.

Illustrator

LearnKey's Adobe Illustrator program introduces both new and experienced users to this software by preparing the user for certification. The Illustrator software is the industry's premier vector-drawing environment for creating scalable graphics. Digital media gurus bring their unique vision to life with shapes, color, effects, and typography by using a host of powerful functions to make fast work of their most complex designs.

InDesign

LearnKey's Adobe InDesign program teaches designing page layouts for both print and Web. This program uses a step-by-step approach to demonstrate the basics of the application and interface and then gradually moves on to more advanced and complex aspects of the software. Adobe InDesign is a powerful tool that sets the industry's new standard for print and digital page layout. Offering pixel-perfect control over design and typography, users can create elegant and engaging page layouts for print or digital media. And with so many powerful new features, certified students verify more advanced skill using InDesign than their non-certified peers.

Included

- Adobe ACP courses: Photoshop, Illustrator, and InDesign
 - instructive video
 - interactive labs
 - pre-tests/post-tests
 - online project workbooks
- Access to Adobe CC software (6 months)
- GMetrix practice tests
- Exam vouchers with retake option
- LearnKey educational coaching with live group tutoring sessions
- Certify for Life program

Adobe Certified Professional in Video Design

Overview

The Adobe Certified Professional in Video Design validates the individual's expertise in creating and editing videos using Adobe Creative Cloud. It requires professional-level skills and knowledge to effectively create graphics, animations, and special effects.

Premiere Pro

LearnKey's Adobe Premiere Pro program teaches the basics of working in the digital video industry; how to create, navigate, and organize a project and the application interface; how to create and modify elements of digital video; and how to publish a final project for distribution. Professionals use Premiere Pro to produce and edit productions fluidly and keep up with the rapid advancement of video and multimedia technology.

Photoshop

LearnKey's Adobe Photoshop program is designed for both novice and advanced users when preparing for certification. Photoshop is the industry-standard image editing software, used worldwide by professional photographers, amateur photographers, and designers who want to perfect their digital images by going beyond what is captured by the camera.

After Effects

LearnKey's Adobe After Effects program is built for those who want to become motion graphics and visual effects specialists or are just looking to become more employable in the areas of video post-production. This course also helps users get ready to earn the brand-new Adobe Certified Professional (ACP) for After Effects certification. After Effects is a very robust and complex application and this course will help users learn and better navigate the program. It will also help to unleash creative prowess in the areas of motion graphics and visual effects. With After Effects, users can take any idea and make it move.

Included

- Adobe ACP courses: Premiere Pro, Photoshop, and After Effects
 - instructive video
 - interactive labs
 - pre-tests/post-tests
 - online project workbooks
- Access to Adobe CC software (6 months)
- GMetrix practice tests
- Exam vouchers with retake option
- LearnKey educational coaching with live group tutoring sessions

Adobe Certified Professional Bundle

Graphic Design

Overview

Our Adobe ACP program consists of education and certification in multiple Adobe graphic design based applications. Although the courses are very good at teaching the software, art or design principles are not taught in this program. Students will learn how to use the Adobe software to manipulate photos, blend images, digitally illustrate, create motion tools, produce polished documents, design visually or in code, edit audio/video, and much more!

Included

- Adobe ACP courses
 - instructive video
 - interactive labs
 - pre-tests/post-tests
 - online project workbook
- Access to Adobe CC software (1 year)
- GMetrix Practice Tests
- Exam vouchers with retake option
- LearnKey educational coaching with live group tutoring sessions
- Certify for Life program

Certification Partners

LearnKey has partnered with industry-leading certification vendors to deliver the best and most accurate courseware available.

CompTIA

CompTIA is the voice of the world's information technology (IT) industry. As a non-profit trade association, CompTIA advances the global interests of IT professionals and IT channel organizations and enables them to be more successful with industry-leading IT certifications and IT business credentials, IT education and resources, and the ability to connect with like-minded, leading IT industry experts.

Certiport

Certiport's standards-based certifications establish digital literacy and critical job skills, as well as provide globally portable credentials. As a global certification leader, Certiport validates fundamental computer skills and knowledge through performance-based testing. LearnKey's partnership with Certiport enables us to aid you in preparing to achieve your Microsoft Office Specialist (MOS) certification or the Internet and Computing Core Certification (IC3) using our approved courseware.

GMetrix

GMetrix works with partners throughout Europe, the middle East, Asia, and North and South America to provide educational tools designed to prepare individuals for the effective use of technology in the business environment. Additionally, GMetrix is currently the exclusive distribution partner of Wiley & Sons Publishing for Microsoft Official Academic Curriculum (MOAC) in Latin America and Germany.

EC-Council

The International Council of E-Commerce Consultants, also known as the EC-Council, is the world's largest cybersecurity technical certification body. It operates in 145 countries globally and is the owner and developer of the world-famous Certified Ethical Hacker (CEH), Computer Hacking Forensics Investigator (CHFI), Certified Security Analyst (ECSA), License Penetration Testing (Practical) programs, etc.

Christmas Day

Student Retention

All students attending LearnKey will report weekly to their assigned Student Service Representative (SSR). The student will receive regular weekly or bi-weekly contact from their designated SSR.

Students are also contacted by our Employability Team periodically to talk about employment goals.

If a student falls behind or fails an exam, their SSR will coordinate additional tutoring and resources. The SSR will continue to follow-up with the student until all issues are resolved.

Once the student completes their program, the SSR and Employability teams combine their efforts to provide the student with employment opportunities, including introductions to our partner employers. LearnKey strongly encourages the student to communicate with their assigned SSR should they need any additional assistance as they progress through their program.

Academic Standard of Progress

Standards of Academic Progress have been established to help our students to maintain a satisfactory level of engagement and progress toward their stated education and credentialing goals. The LearnKey staff administers this policy through our online learning management systems (LMS) resources and informs the student and other responsible parties of the status and student's academic outlook. The LMS tracks students' logged in time and progression. Allocated time is given to test prep and exam testing in all student timelines. LearnKey uses a sophisticated software program that tracks daily and weekly tasks. Detailed notes are tracked to ensure the student has been made aware of expectations and that we are providing satisfactory service.

Progress Standard

All students who engage in an education program with LearnKey are expected to adhere to their start and end dates as specified in their timeline. Due to federal regulations, LearnKey must report any significant negative deviance from the schedule. It is important for each student to immediately report any circumstances which may keep them from progressing in their educational program. If students can progress faster than the allotted time, this is highly recommended. For some students, this can create an opportunity to use their remaining benefit time toward other education goals.

Grades

Each education module or program consists of curriculum from our learning management system as well test prep, virtual labs, and exams, which simulate the associated proctored exams. All courses in this program are graded on a pass/fail system and each element of each module must be completed with a satisfactory score to receive a passing grade. Upon completion of the required course objectives, students are provided with a testing voucher to take their exam at the nearest testing center. The certification will act as the final activity required to complete the course.

Passing percentages are:

- Learning Management System (Online Expert) – a score of 80% or greater on each session's post-assessment is required before moving into test prep.
- Simulated exams/simulators require a score of 90% or greater in order to receive the testing voucher for their certification exam.
- Proctored exam scores vary by subject.

Outcome Assessments

Each student is required to achieve the minimum requirements listed above for all exams to pass the certified education module.

Academic Probation

Students who fail to meet the requirements of LearnKey's Academic Standards of Progress (defined on the previous page) will be put on academic probation. Placing a student on academic probation is at the sole discretion of the SSR assigned to them. Such a move will only occur after there has been attempts to make corrective actions by the SSR. Actions which result from being placed on academic probation may include suspension of courses, reduction or elimination of stipend/housing pay (if applicable), or other issues as identified by the LearnKey team. A complete copy of all documentation will be supplied to the student.

Appeals

Students may appeal the decision to be placed on academic probation by presenting their case in writing to the LearnKey Student Services manager. Each appeal will be reviewed and discussed with the appropriate parties. The student may request a conference call to be attended by all interested parties.

Reinstatement

Students may apply to be reinstated to their LearnKey program after one week, but no longer than six months after probation. To do so, students should submit their request for reinstatement to the LearnKey Student Services manager. An outline of the actions/interactions which resulted in the academic probation will be provided to the student of how the issue will be resolved if they are reinstated. The LearnKey Student Services manager will then discuss the reinstatement with the appropriate parties and/or the student to determine if reinstatement is appropriate.

Statement of Records

The LearnKey staff routinely collects data on every student with regards to their progress in their program. Collection methods include, but are not limited to: LMS data, telephone calls, email, and other electronic interaction. Collected data will be used for the sole purpose of advancing the student in their chosen education path, as well as complying with state and federal law. Information will not be sold or used for any activity outside of LearnKey and its education partners.

Code of Conduct

Students enrolling in LearnKey's online education programs assume an obligation to conduct themselves in a manner compatible with the school's function as an educational institution. Our programs are specifically designed to prepare our students to have the academic skills, mindset, vocabulary, behavior, and attitude that are required for the workplace. In order to accomplish these goals, LearnKey has adopted a three-strike policy similar to policies found in a typical workplace. Written warnings will be issued for the first two occurrences of misconduct. The third occurrence will result in disciplinary actions, which may include removal from the program.

Examples of misconduct include (without limitation) verbal abuse, sexual harassment, incomplete work, unprofessional attitude, or any other behavior or action deemed unprofessional by any of the LearnKey Student Services members.

Harassment and Sexual Harassment

LearnKey is committed to fostering an online learning environment free of harassment. This may include verbal or written conduct which is unwelcome or shows hostility or aversion toward an individual. Any of the items specified will not be tolerated. Harassment is any verbal or physical action based upon race, color, creed, religion, gender, national or ethnic origin, age, handicap, or sexual orientation. Sexual harassment includes sexual advances, requests for sexual favors, or unwelcome contact. Sexual innuendos, use of obscene language, and telling sexual jokes can also be construed as sexual harassment. A fundamental belief of LearnKey is that each member of the community has a right to a healthy and supportive environment for learning and working. All members of the community are responsible for ensuring that the LearnKey virtual environment is free from harassment. Complaints of harassment will be promptly and carefully investigated. All members of the community are assured that they will be free from any and all reprisal from filing a complaint. Harassment of any sort will result in disciplinary action.

Honesty in Academic Work and in Scholarly and Professional Practice

LearnKey values integrity within the online classroom, across all areas of scholarly and professional practice, and in the use of information technology resources. Members of the LearnKey community are expected to maintain high standards of honesty, throughout the aspects of their life, and while enrolled in the LearnKey educational programs. Evidence of academic dishonesty may be made subject to disciplinary procedures, including but not limited to receiving a warning, dismissal from the course, suspension, or permanent dismissal from the online school.

The following definitions are provided for the information of the LearnKey online community and constitute notice of unacceptable academic behavior, or scholarly and professional practice. Academic work in this context means any and all work related to any course or program at LearnKey. While scholarly and professional work may occur in the context of a course, it can include unacceptable resources outside of the LearnKey program, dishonesty in scholarly or professional work, and any form of fraud, plagiarism, or cheating. All items specified are unacceptable and subject to appropriate disciplinary procedures.

Fraud is using identifiers (such as name, passwords, ID) of other people as one's own or submitting false information about oneself. Examples include concealing or misrepresenting one's identity, impersonating another individual, falsifying information on documents as one's resume or internship applications, misrepresenting oneself as acting on behalf of LearnKey, or using the LearnKey name or logo without prior written permission.

Plagiarism is representing another person's work as yours. This also includes misrepresentation that has been accomplished with or without the permission of the other individual.

Cheating is the use of prohibited assistance (either from another person or a resource) in the performance of assignments and examinations. It also includes copying another student's work or giving of information on answers, whether verbally or in writing.

Blacklisted test preparation programs, which provide exact answers for a certification exam, are strictly forbidden to be used in any combination with LearnKey courses or programs. It is the student's responsibility to investigate and understand which non-LearnKey programs are blacklisted by the indicated certification authority. **WARNING** – certification authorities have become very good at learning if a student has used blacklisted materials. Penalties for those who are caught using them include lifetime bans from being able to get certified, essentially ending one's career in that field.

Program Withdrawal/Drop and Tuition Refund Policy

A student may drop a course they are attending within the first 7 days of the start of the course. A full refund, minus costs of materials shipped, ordered, or consumed if applicable. Materials include books, hardware, software, etc.

If a student drops any course from day 8 to 30, a full refund will be issued minus costs of materials shipped, ordered, or consumed if applicable in addition to a 20% administration fee.

After day 30, there is no refund for the course that they have started. For any courses not started in the student's program term, a full refund, minus costs of materials shipped, ordered, or consumed if applicable.

All courses/terms that have been billed for will not be eligible for a refund after 1 year of the date the billing was submitted. Courses will remain available to the student for the duration of the certification exam availability. This can range anywhere from a couple of months to three years, depending on when the student enrolled in the program. LearnKey has a surety bond in the amount of \$12,500.00.

Use of the LearnKey Name

LearnKey provides dynamic educational video courseware which is flexible and accessible in YOUR environment. Whether you are a teacher, student, or corporate employee, we have a variety of services that will meet your learning requirements.

OnlineExpert, our powerful, feature-filled learning management system, is the gateway to fulfilling your educational needs. LearnKey's expert-led educational video courseware and in-depth exam prep covers a wide variety of subjects. You can train to certify or to simply broaden your skills.
