- 43** Premiere Pro 2024

IT Specialist - Device Configuration and Management

Overview

LearnKey's IT Specialist - Device Configuration and Management course, Windows 11 edition, is an excellent starting point for anyone interested in an IT career. It covers basic Windows and device management, a skill virtually all IT personnel need. Specifically, the course covers Windows installation and configuration, Windows features, application, and peripheral management, data access and management, device security, and Windows management and troubleshooting. The course also helps one prepare for and obtain the IT Specialist Device Configuration and Management certification.

Expert: Noah Solomon

Product ID #: 632939

Length: 5 Hours

IC3 Global Standard 6 (GS6) - Level 1

Overview

LearnKey's IC3 GS6 Level 1 course goes over basic technology concepts like hardware and software, operating systems, and connectivity. It teaches users how to protect their personally identifiable information, data, and digital identity. It covers digital communication and collaboration while explaining their appropriate etiquette standards. Students will learn how to search for, legally use, and properly cite online content. This course is the first of three levels of the IC3 GS6 certification.

Expert: Natasha Nelson

Product ID #: 632239

Length: 10 Hours

IC3 Global Standard 6 (GS6) - Level 2

Overview

LearnKey's IC3 GS6 Level 2 course goes over basic technology concepts like device and browser settings, cloud computing, processing devices, and content creation. It teaches users how to share data and collaborate online using the appropriate tools and etiquette. Students will become familiar with safety and security issues associated with the use of digital technology and know-how to protect themselves and others. This course is the second of three levels of the IC3 GS6 certification.

Expert: Natasha Nelson

Product ID #: 632339

Length: 8.5 Hours

IC3 Global Standard 6 (GS6) - Level 3

Overview

LearnKey's IC3 GS6 Level 3 course explores ways to create content like videos, tables, and flowcharts. It teaches students how to keep their data secure using virus-scanning software and multifactor authentication. Students will learn how to search for, legally use, and properly cite online content, along with how to best resolve issues with clients by working internally with teammates to identify and understand the issue. This course is the last of three levels of the IC3 GS6 certification.

Expert: Natasha Nelson

Product ID #: 632519

Length: 8.5 Hours

IC3 Spark

Overview

LearnKey's IC3 Spark course is focused on teaching younger students the basic foundational knowledge covered in LearnKey's IC3 GS5 training. Join LearnKey expert Wyatt Ihler for over 2 hours of online video training and project-based activities. Students will learn a broad range of computing knowledge and skills including: software, hardware, operating systems, key applications, and living online.

Expert: Wyatt Ihler

Product ID #: 631789

Length: 7 Hours

Microsoft 365 Fundamentals (MS-900)

Overview

LearnKey's Microsoft 365 Fundamentals (MS-900) course covers concepts of the Software as a Service (SaaS) portion of the cloud through introducing one to manage implementations through Microsoft 365. This course is excellent for those wanting to obtain the Microsoft 365 Fundamentals certification and become more employable in the area of SaaS administration. Specific topics in this course include: cloud concepts; core Microsoft 365 services and concepts; security, compliance, privacy and trust in Microsoft 365; and Microsoft 365 pricing and support.

Expert: Jason Manibog

Product ID #: 281099

Length: 7.5 Hours

Databases

Overview

LearnKey's Databases course is an introduction to building, entering information into, and querying databases. The course also provides a solid introduction to Structured Query Language (SQL), the primary language used to get the desired information from a database. This course helps one get ready to take and pass the IT Specialist Databases exam and will help one's employability prospects in any job requiring querying and junior database administration skills. Specific topics for this course include Database Design, Database Object Management, Data Retrieval, Data Manipulation, and Troubleshooting.

Expert: Jason Manibog

Product ID #: 412569

Length: 6 Hours

IT Specialist - Data Analytics

Overview

LearnKey's IT Specialist - Data Analytics course introduces students to the foundational concepts behind and performance of data analytics. Topics include types of data and data structures, data manipulation techniques, statistical data analysis methods, best practices in data visualization, and ethical data analytics practices. This course serves as a strong entry point for the analytics field as it aims to prepare students for the Certiport IT Specialist Data Analytics certification and a future career in data analytics.

Expert: Noah Solomon

Cisco Certified Support Technician: Cybersecurity

Overview

The Cisco Certified Support Technician (CCST): Cybersecurity certification is ideal for anyone new to the field of cybersecurity and is interested in becoming a cybersecurity specialist. The objectives cover the core topics important to cybersecurity specialists, including essential principles, network security, endpoint security, vulnerability assessments, risk management, and incident handling. Mastering these core topics builds a good foundation for passing the exam and becoming a cybersecurity professional. LearnKey's Cisco Certified Support Technician: Cybersecurity course covers all five exam domains. Join LearnKey security expert Michael Solomon as he covers all the necessary objectives required in the Cisco Certified Support Technician (CCST): Cybersecurity certification exam.

Expert: Michael Solomon

Product ID #: 153389

Length: 7.5 Hours

CISSP 2021 Series

Overview

The (ISC)² Certified Information Systems Security Professional (CISSP) certification is ideal for cybersecurity professionals looking to move up or expand their cybersecurity career prospects. The objectives cover a broad spectrum of cybersecurity topics, including physical security, digital strategy, and policy creation. The CISSP certification is the summit where IT security professionals demonstrate their depth of experience to provide cybersecurity leadership and how it will impact the ecosystem. As a management-level certification, it sits at the top of the DoD Directive 8570 list of certifications. Because of that, it is constantly in demand and comes with an average salary of over \$120k per year. LearnKey's CISSP course covers all eight domains making up the CISSP Common Body of Knowledge (CBK). Join LearnKey expert Michael Solomon to cover all of the necessary objectives required in the CISSP certification exam.

Expert: Michael Solomon

Product ID #: 153099

Length: 26 Hours

Cybersecurity

Overview

The Information Technology Specialist Cybersecurity certification is ideal for anyone new to the field of cybersecurity and is interested in becoming a cybersecurity specialist. The objectives cover the core topics important to cybersecurity specialists, including essential principles, network security, endpoint security, vulnerability assessments, risk management, and incident handling. Mastering these core topics builds a good foundation for passing the exam and becoming a cybersecurity professional. LearnKey's Information Technology Specialist Cybersecurity course covers all five exam domains. Join LearnKey security expert Michael Solomon as he covers all the necessary objectives required in the Information Technology Specialist - Cybersecurity certification exam.

Expert: Michael Solomon

Length: 10.5 Hours

Cybersecurity - Protecting Yourself and Your Organization

Overview

The Cybersecurity – Protecting Yourself and Your Organization course is an approximately one-hour course geared toward helping individuals and organizations better protect their data, devices, and physical locations from cybersecurity-related attacks. Rather than tying to any industry certifications, this course simplifies what individuals and organizations must do to protect digital assets. Topics include: protecting email, protecting information, protecting devices, physical security, and working remotely.

Expert: Jason Manibog

Product ID #: 153469

Length: 1 Hour

Network Security

Overview

LearnKey's Network Security course is geared toward those looking to learn basic operating system security fundamentals. This course will also prepare students to take and pass the Network Security exam. The four main topics covered in this course are: defense in depth, operating system security, network device security, and secure computing. This course will also improve employability prospects for those trying to gain an entry level IT support/desktop position with some basic security knowledge requirements.

Expert: Jason Manibog

Product ID #: 152929

Length: 13 Hours

Security+ (SY0-601 - Updated for SY0-701)

Overview

LearnKey's Security+ (SY0-601) course will prepare you for the CompTIA SY0-601 exam. The latest course places far more emphasis on newer IT security needs, such as the Internet of Things (IoT). This certification will be of tremendous help to anyone looking to become an IT security professional. Topics covered in this course include attacks, threats and vulnerabilities, architecture and design, implementation, operations and incident response, and governance, risk, and compliance.

Expert: Jason Manibog

Product ID #: 152999

Length: 52 Hours

Security, Compliance, and Identity Fundamentals (SC-900)

Overview

LearnKey's Security, Compliance, and Identity Fundamentals (SC-900) course introduces identity management and how properly managing identities impacts security and compliance in cloud-based environments. The course focuses on Microsoft Azure cloud-based environments and integration with existing on-premises Windows and Linux environments. Specific topics include security, compliance and identity concepts, how to manage identities across cloud-based and on-premises environments, security and compliance solutions. This course will help students get ready to pass the SC-900 exam, and help with employability prospects for any job requiring general knowledge of Microsoft solutions to identity, security, and compliance challenges involving cloud-based environments.

Expert: Michael Solomon

Product ID #: 153209

Length: 10 Hours

Conflicts, Communications, and Relationships

Overview

This course offers students a chance to develop their communication skills in all types of relationships. A series of scenarios describe typical conflicts between friends, siblings, parents and children, and an employee and boss. A leading adolescent psychologist helps students understand the scenarios by showing how maximizing communication, listening, and mediation skills can help to resolve most conflicts. Students take turns figuring out what they would do to enhance the communication and resolve the conflict for each situation.

Emotional Self-Control: Do You Have It?

Overview

National studies warn that many of today's teens have failed to develop vital emotional abilities they will need to go through life. Some of these emotional abilities are handling conflict, planning ahead, resisting anxiety and learning to control hot-tempered reactions. Using real life scenarios, this program actually teaches students emotional self-control by showing them four basic ways to evaluate their own feelings and understand when they might be moving in the wrong direction.

Expert: LearnKey Signature Courseware & Human Relations Media

Product ID #: 120789

Length: 1 Hour

Hurting With Words

Overview

This course is designed to raise awareness of a very real, yet often overlooked, form of abuse: emotional violence. Hurtful words include threats, bullying, and intimidation—anything which causes feelings of humiliation, fear, or worthlessness on the part of the victim. You'll examine the causes of many different types of emotional abuse: men to women, husbands to wives, parents to children, adults to children, and group to group. At the conclusion of this course, you'll be aware of many successful methods of dealing with verbally or emotionally abusive people.

Expert: LearnKey Signature Courseware & Human Relations Media

Product ID #: 120829

Length: 1 Hour

Action Toward Accountability

Overview

Based on research conducted by Partners in Leadership, less than 20% of individuals successfully hold others accountable for delivering on expectations in the workplace. In this course, you will learn about the essence of accountability, how to establish an accountability mindset, and how to strengthen the behaviors and skills that support action toward accountability. You will be introduced to strategies that will support your personal accountability, which you can then extend to promote a culture of accountability. Whether you're looking to improve your performance at work, strengthen your personal relationships, or become a more reliable leader, this course will provide the tools and insights you need to succeed. By the end of the course, you will have developed essential skills in personal accountability that will help you and your team achieve greater success.

Building Self-Trust and Credibility

Overview

Do you struggle with imposter syndrome, second-guessing your decisions, or having difficulty building trusting relationships with others? If so, you may be experiencing a lack of self-trust, which can significantly impact your personal and professional life. Throughout this course, you will explore the essence of self-trust and how it is the core of the trust model. You will learn how to identify gaps and strengthen your self-trust. With self-trust as a foundation, you will then explore the qualities that establish credibility and how to develop trusting relationships and positively influence others. Whether you are an individual contributor or a mid-level manager, this course will provide the tools and insights you need to build self-trust, establish credibility, and develop trusting relationships. Join us on this journey to become a more confident and trustworthy leader.

Expert: Kerri Laryea
Product ID #: 040239
Length: 1 Hour

Creating an Inclusive Culture

Overview

In today's diverse and interconnected world, fostering an inclusive culture is essential for organizations to thrive. This introductory course exposes participants to the knowledge and skills needed to cultivate an environment where everyone feels valued, respected, and empowered to contribute their unique perspectives and talents. Join us to take the first steps towards building a more inclusive and equitable future.

Expert: Kerri Laryea
Product ID #: 040749
Length: 2.5 Hours

Delegating Work Effectively

Overview

Unlock your leadership potential with effective delegation. Join Mark, a senior campaign manager struggling with delegation, on his transformative journey toward effective delegation. Learn through his experiences as you build your understanding, skills, and toolkit. Discover the immense value of delegation and its significance in optimizing your productivity. Identify your unique delegation style and evaluate its impact on your effectiveness. Learn to demonstrate emotional intelligence, establish clear communication channels, and effectively train and develop your team. Equip yourself with the skills to identify suitable tasks to delegate, communicate expectations, provide autonomy, and support and monitor progress. Unleash your leadership potential and optimize team productivity with practical tools and strategies.

Expert: Kerri Laryea
Product ID #: 040539
Length: 2 Hours

Delivering Constructive Feedback

Overview

Feedback is a gift. We cannot learn new skills and improve our performance without the gift of feedback. Managers who struggle to provide timely, constructive feedback to employees limit their employees' potential for performance improvement, as well as their own. Feedback is the information you give employees about their past performance, delivered in the present and designed to influence future behavior. Constructive feedback is actionable and within one's abilities to address, whereas unconstructive feedback is out of someone's control to change. In this course, you will learn to deliver constructive feedback by following these approaches: set the stage, check yourself, and follow the process.

Expert: Kerri Laryea
Product ID #: 040039
Length: 1 Hour

Effective Communication and Productive Conversations

Overview

This course is designed to help you develop strong communication skills in the workplace and facilitate more productive conversations with coworkers. Effective communication is essential for building trust and maintaining successful relationships with colleagues and employees. In this course, you will follow Jason's journey to becoming a more effective communicator at work. Through his story, you will explore different communication styles and learn how to adapt your communication to be more effective. In addition, you will discover the negative impact of ineffective communication regarding workplace errors, delays, and misunderstandings, leading to decreased productivity and increased costs. You will also learn how to use productive conversations to get better results with coworkers and employees. You will gain essential skills in honest, vulnerable, and clear communication to help you build stronger relationships with your colleagues and enhance your effectiveness in the workplace..

Expert: Kerri Laryea
Product ID #: 040419
Length: 1.5 Hours

Entrepreneurship and Small Business

Overview

LearnKey's Entrepreneurship and Small Business course is designed to prepare a student to sit for the Entrepreneurship and Small Business certification exam. The course provides scenarios and example questions to apply knowledge of fundamental entrepreneurship and small business management concepts. Topics covered include: defining an entrepreneur, recognizing an opportunity, starting and operating a business, how to market a business, managing sales, and basic financial management. The course is designed for a student who has taken a small business management class, but will prepare any student for the ESB exam.

Maintaining Employee Engagement

Overview

Invest in your organization's success by prioritizing employee engagement. The key to fostering a motivated, high-performing workforce lies in maintaining strong levels of engagement among your employees. This interactive course will equip you with the knowledge, strategies, and tools to cultivate a culture of engagement within your organization. Through real-life scenarios and practical examples, you will explore the three levels of employee engagement to understand their impact on productivity, innovation, and overall organizational success. You will gain insight into the role of leadership in driving engagement learning how to adapt your leadership style to maximize employee motivation and commitment.

Expert: Kerri Laryea
Product ID #: 040479
Length: 1.5 Hours

My Success Drivers

Overview

When people have a better self-understanding of what matters to them, they can bring their best skills and talents to their work and find more enjoyment with others at work. Employees who feel connected to their organization work harder, stay longer, and motivate others to do the same. Employee engagement affects just about every important aspect of your organization, including profitability, revenue, customer experience, employee turnover, and more. In this course, you will learn your success drivers and how to use them effectively, including leveraging your strengths and values, managing work stressors, maximizing motivators, and workplace engagement.

Expert: Kerri Laryea

Product ID #: 040169

Length: 1 Hour

Navigating Conflict Effectively

Overview

Your ability to navigate conflict effectively depends on your skills in establishing a positive mindset that helps you self-regulate your skills with building trusting relationships and your ability to leverage tools that optimize communication and collaboration. In this course, you will learn to effectively navigate conflict by focusing on these three areas: how to recognize conflict, how to manage conflict, and how to address conflict.

Expert: Kerri Laryea

Product ID #: 040099

Length: 1 Hour

Resilience

Overview

Resilience is the ability to withstand adversity and bounce back from difficult life events. Being resilient requires a skill set that you can work on and develop over time. Building resilience takes time, strength, and help from people around you; you will likely experience setbacks along the way. It depends on personal behaviors and skills (like self-esteem and communication skills), as well as external things (such as social support and resources available to you). In this course, you will learn what the various types of resilience are, how to assess your personal level of resilience, and how to train yourself to be more resilient. You will also learn how to build resilience in the workplace.

Working and Managing in a Virtual Workplace

Overview

In today's rapidly evolving corporate landscape, working and managing effectively in a virtual setting is necessary. This course offers practical strategies and techniques to navigate the challenges of remote work and foster a culture of collaboration in a virtual workplace. The course focuses on essential topics such as the importance of embracing the virtual landscape and adapting to the needs of others to be productive, building trust and connection, navigating communication challenges, and facilitating productive virtual collaboration. Ultimately, the course offers individuals a perspective on how to thrive as team members and leaders in the virtual work environment.

A+ (220-1201) Series

Overview

LearnKey's A+ series of courses, starting with the 220-1201 exam (also known as the Core 1 exam), prepares students for the premier certification for people looking to gain employability in a tech support role. These courses will help people gain the skills needed to eventually move to a higher IT role, such as tech support manager or application support specialist. Specifically, the 220-1201 course focuses on hardware and troubleshooting and covers mobile devices, networking, hardware, virtualization and cloud computing, and hardware and network troubleshooting. The exam is the first of two exams one needs to pass to obtain the A+ certification.

Expert: Jason Manibog

Product ID #: 104779

Length: 20.5 Hours

A+ (220-1202) Series

Overview

LearnKey's A+ 220-1202 course is the second half of the A+ certification series. The 220-1202 exam, also known as the Core 2 exam, focuses more on the software aspect of information technology. Specific topics covered in this course include operating systems, security, software troubleshooting, and operating procedures. Passing this exam and the 220-1201 exam will gain one the A+ certification, a leading industry certification for technical support and troubleshooting. This certification will also help employability prospects for entry-level to mid-level IT positions requiring technical support knowledge.

Expert: Jason Manibog

Product ID #: 104859

Length: 31.5 Hours

Azure Administrator (AZ-104)

Overview

The Azure Administrator (AZ-104) course is for those looking to become Azure administrators and earn the Azure Administrator Associate certification. Specific topics covered include: managing Azure subscriptions and resources, implementing and managing storage, deploying and managing virtual machines, configuring and managing virtual networks, and managing identities.

Expert: Jason Manibog

Product ID #: 280959

Length: 9.5 Hours

Azure AI Fundamentals (AI-900)

Overview

LearnKey's Azure AI Fundamentals (AI-900) course is an introduction to building artificial intelligence (AI) machine learning models through Azure. The course also covers basic AI concepts, giving those who take this course an increase in skills needed to land an introductory AI-based job. Specific exam topics include AI workloads and considerations, fundamental principles of machine learning, computer vision workloads, Natural Language Processing (NLP) workloads, and conversational AI workloads.

Expert: Jason Manibog

Product ID #: 374399

Length: 8 Hours

Azure Data Fundamentals (DP-900)

Overview

LearnKey's Azure Data Fundamentals (DP-900) course provides a fundamental introduction to cloud-based data storage and analytics services with an emphasis on Microsoft Azure. The course is an excellent step in learning about today's data environments and analytics capabilities in Azure, as it will prepare students for the DP-900 exam. This course will cover core data concepts, relational and non-relational data storage techniques, and address today's data analytics requirements. This course is a great choice for anyone aspiring to improve their employability prospects for an Azure Database Administrator, Data Engineer, or Data Analyst career path.

Expert: Michael Solomon

Product ID #: 281419

Length: 3.5 Hours

Azure Fundamentals (AZ-900) - 2025 Edition

Overview

LearnKey's Azure Fundamentals (AZ-900) certification provides a fundamental introduction to cloud services with an emphasis on Microsoft Azure. The course serves as an excellent stepping stone to learning Azure further as it will prepare students for the AZ-900 exam, a Microsoft exam on Azure Fundamentals. Specific topics covered in this course include cloud concepts, architecture and services, and management and compliance. This should be the first course for anyone aspiring to improve their employability prospects for any Azure Administrator, Developer, or Data Analyst career path.

Expert: Jason Manibog

Product ID #: 281489

Length: 2.5 Hours

Azure Security Engineer (AZ-500)

Overview

The Azure Security Engineer (AZ-500) course is for those who want to become Azure security engineers and, specifically, those who want to obtain the Azure Security Engineer Associate certification. Specific topics covered include: managing identity and access, implementing platform protection, managing security operations, and securing data and applications.

Expert: Jason Manibog

Product ID #: 281029

Length: 12 Hours

Certified Network Associate (200-301)

Overview

The Certified Network Associate (220-301) course is geared toward entry-level and burgeoning Cisco network administrators and covers the material on the brand new, all-in-one Cisco CCNA exam. Topics covered include network fundamentals, network access, IP connectivity, IP services, security fundamentals, automation, and programmability, with an emphasis on configuring and verifying aspects of routers and switches. The material in this course both maps to the 200-301 exam and boosts the employability prospects for those looking to become network administrators.

Expert: Jason Manibog

Cisco Certified Support Technician: Networking

Overview

The Cisco Certified Support Technician (CCST) – Networking certification is a junior-level networking certification that is general in nature but with some focus on Cisco-related topics, especially for Cisco device commands. This course will help anyone looking to launch an IT career as a support technician or similar position. Specifically, the course covers networking standards and concepts, addressing, endpoints and media types, infrastructure, troubleshooting, and security.

Expert: Jason Manibog

Product ID #: 564929

Length: 3.5 Hours

Cisco Certified Support Technician: IT Support

Overview

The Cisco Certified Support Technician – IT Support course is a perfect launching point for someone looking to break into the IT field. This course covers many aspects of help desk support for end-users and gets one ready to take and pass the Cisco Certified Support Technician – IT Support exam. Specifically, this course covers: IT support job tasks and responsibilities, hardware issues, connectivity and resource access issues, operating system and application issues, common threats and preventions, and job tools. As help desk agents do a lot of troubleshooting, most of the course has a troubleshooting aspect to the topics covered.

Expert: Jason Manibog

Product ID #: 632849

Length: 3.5 Hours

IT Fundamentals (FC0-U61)

Overview

LearnKey's IT Fundamentals (FC0-U61) course will focus on essential IT skills and foundational knowledge for an entry level IT professional. Specific topics covered include: concepts and terminology, infrastructure, applications and software, software development, and security and database fundamentals. Among these topics, students will learn how to identify types of software, how to use an operating system, understand common peripherals, and learn key troubleshooting methodologies. At the completion of this course students will be prepared to take the IT Fundamentals exam and will be more employable for any entry level IT position.

Expert: Jason Manibog

Product ID #: 632619

Length: 17.5 Hours

IT Specialist - Cloud Computing

Overview

This video course is designed to prepare students for the Certiport IT Specialist certification in Cloud Computing and a potential future career in the topic area. It covers fundamental cloud concepts, including cloud service models (IaaS, PaaS, SaaS) and deployment models (public, private, hybrid). Students will learn to develop cloud architecture, implement the cloud development lifecycle, and deploy cloud-based applications. Additionally, this course covers essential cloud governance principles, such as compliance, security, and cost management, to ensure effective and efficient cloud operations. By the end of this course, students will have the knowledge and practical skills to succeed in the certification exam and real-world cloud environments.

Key exam topics include cloud concepts and service models, designing and developing cloud architecture, implementing the cloud development lifecycle, deploying and managing cloud applications, and cloud governance, security, and compliance.

Microsoft Power Platform Fundamentals (PL-900)

Overview

The Power Platform Fundamentals course introduces students to Power Platform, a suite of apps that help to automate business processes and analyze data within an organization. The suite comprises Power Apps, Power Automate, Power BI, Power Virtual Agents, and Power Pages. The course covers all five of these apps at a high level and gets one ready to obtain the Power Platform Fundamentals certification. And the course simulates a real-world environment in which Power Platform apps are used, thus readying one to be more employable for any job that requires Power Platform skills.

B Careful When U Txt: The Dangers of Texting and Sexting

Overview

Cell phones have become indispensable gadgets for most of us. We use these devices not only to talk, but to keep track of schedules, email, search the Internet, chat online, and text our friends. It should come as no surprise, then, that some of us are sending, simply put, the wrong message. Perhaps not realizing the dangers inherent in cell phone use, we are putting themselves—and others—at risk. The dangers these behaviors cause is real and comes in two main forms: physical and emotional. The physical dangers can come from activities like using a phone at a time or place that is unsafe or from allowing personal information to fall into the wrong hands. The emotional dangers arise when we inadvertently subject ourselves and others to harassment or shame. This course will teach responsible cell phone use and best practices, in fact, many of these practices are the same techniques used to make computer and Internet use safe. The fact is that cell phones are here to stay and their features are always evolving. This course empowers users to take and stay in control of their cell phone use.

Matching Your Skills, Talents, and Ambitions to a Dream Career

Overview

"Find your passion" is the mantra of guidance counselors and graduation speakers in schools across the nation. The first step in any job-seeker's career map to success is figuring out their own unique skills and talents. The best jobs are those that are interesting and challenging, and also allow employees to use their aptitudes and abilities to the fullest. Job-seekers wonder if there is a formula for finding that magic combination. One variable in that magic equation is exploration--exploration is an essential tool for any career map. The wider a net that students cast in the sea of career opportunities, the better chance they have of finding jobs that truly inspire them. The Matching Your Skills, Talents, and Ambitions to a Dream Career course outlines several strategies that job-seekers can use to create a personal career map. Through expert advice and real-life examples of young people happily employed in their dream careers, vital career lessons will be learned: how to examine talents, how to connect findings to a dream job, and how to map out a path to achieving goals of career success.

The Drug-Free Workplace

Overview

Even if drug-free workplace training is not legally mandated in your business or industry, everyone benefits from raising employee awareness on the impact that drugs or alcohol can have on your workplace. Performance and safety sink fast when employees abuse alcohol or drugs. Others may feel they have to take up the slack when their coworkers attempt to work under the influence—falling short of expectations and increasing the risk of accident or injury. This brand new release features believable scenes in construction, manufacturing, hospitality, food service, and business. It raises your employees' awareness of this widespread problem, shows the harm that can be done to themselves and others, and encourages them to get help if they or a coworker is affected by drug or alcohol abuse.

Adobe InDesign - Print and Digital Media Publication 2024

Overview

In this comprehensive InDesign course, you will learn how to build print and online publications. You will see how to use the InDesign interface, including how to use tools and panels, and even how to customize your workspace. To create professional publications in InDesign, you will need to create text and graphic frames, as well as place content and images. Then, you will learn more complex skills such as master pages, guides, styles, tables, and form fields. And finally, you will learn how to export your publication for print or digital use. By the end of this course, you should feel comfortable building a publication from scratch and adding any useful features to your document.
